

Wireless PIR Motion Detector (RF 433Mhz)

This wireless PIR Motion Sensor can accurately detect human-body motion, with good performance on pet immunity for small pets less than 15kgs. This motion sensor adopts advanced chipset, with very low false alarms rate. It can work with GSM Alarm System wirelessly, sending lower battery alerts, tamper alerts and alarm alerts. Then, calls, SMS and push notification will be sent to your cellphone. No matter where you are, your house/office is under monitoring in your cellphone.

Specification:

| | |
|-----------------------|--|
| Power Supply | 1.5V AA Battery * 3 |
| Standby Current | < 15uA |
| Alarm Current | < 25mA |
| Pet Immunity | < 15kg |
| Detection Scope | <12m/110 ° |
| Transmitting Distance | <80m (in open area and no interference) |
| Radio Frequency | 433 Mhz |
| Operation Temperature | 0-55 °C |
| LED Indicator | Yes |
| Mounting Height | 2-2.2m above the ground |
| Alarm Output | alarm alert, tamper alert, low battery alert |
