

X9

Semi-conductor Fingerprint & RFID Access Control

X9 is an innovative biometric fingerprint reader for access control applications. It adopts semi-conductor fingerprint sensor and ZKFinger V10.0, which can realize reliable and precise identification performance, together with excellent matching speed.

It can operate on standalone mode with the interface for third party electric lock, alarm, door sensor, exit button and doorbell. Keypad operation is easy and convenient, such as, enrolling user, deleting user and accessing control parameter settings etc.

X9 is released to meet the general requirement from low level market. It comes with elegant and compact design, supporting fingerprint, card and Password identification.
