

AJB-332

Ultrasonic Audio Jammer

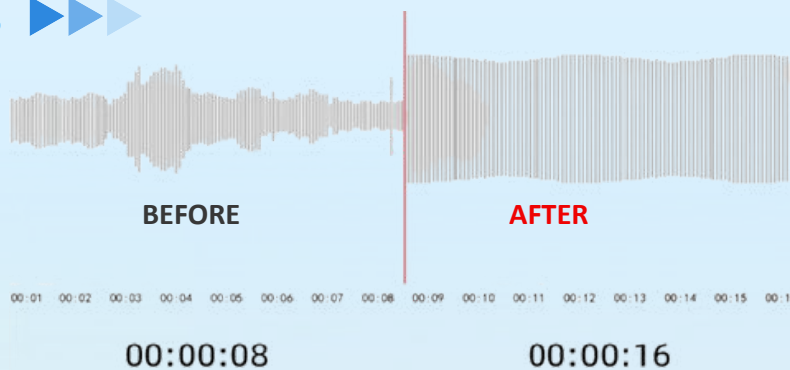

Description ▶▶▶

“Total Privacy, Zero Disconnection.”

The AJB-332 redefines secure conversations by blocking microphones while keeping you online. This is a desktop ultrasonic audio jammer box with 2 slots, featuring efficient jamming, simple operation and flexible deployment. By adopting our advanced ultrasonic mixing technology, it effectively prevents illegal eavesdropping via smartphones and recording apps. The device only acoustically jams the microphone, without affecting the phone's call, network or SMS. It ingeniously resolves the dual dilemma in high-end scenarios of “strictly preventing recording leaks while keeping communications online.”

The jammer comes in a flip-cover lightweight structure with a built-in large-capacity battery, allowing immediate use without fixed installation. Its black edge design also effectively blocks cameras, eliminating the risk of surreptitious filming from the source. The AJB-332 is the ideal audio jammer for high-sensitivity scenarios such as business negotiations, confidential meetings, and legal communications.

How it works ▶▶▶

Ultrasonic Jammer operates by emitting high-frequency sound waves to deceive the microphone, typically above the range of human hearing (20 kHz+). The microphone can only receive the harmonic ultrasonic signal generated by the jammer, and cannot pick up the normal voice signal. The recorded audio only plays noise, and cannot be analyzed using technical means (the noise completely covers the speech).

6 Features making it outstanding ►►►

100% Jamming Effectiveness

It is compatible with all Android phones and iPhones.

Inside the box, it achieves 100% jamming effectiveness.

Multi-Device Protection

Supports simultaneous jamming for 2 cellphones, ensuring high-efficiency shielding.

Easy Operation

Simply place the phone in, and it automatically senses and activates ultrasonic interference.

FEATURES

Long Battery Life

It can work continuously for 8 hours, meeting the needs of long-duration shielding requirements.

Safe & Silent

Advanced ultrasonic mixing technology effectively blocks recording silently without any audible noise.

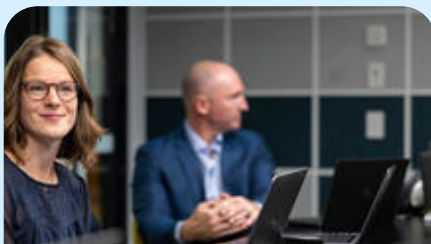

Connectivity Unaffected

Only blocks the phone's microphone and camera, without affecting normal incoming calls, network or SMS.

Applications ►►►

The AJB-332 audio jammer box is suitable for all scenarios where you want to block cellphone positive recording or passive recording through eavesdropping apps. It is typically suitable for Government Officers, Politicians, High-End Company Leaders, VIPs, etc.

Business Negotiations

Executive Offices

Private Clubs

✓ High-End Business Negotiations

Ensuring trade secrets and pricing strategies are not "accidentally" recorded by the other party's phone.

✓ Executive Offices

An essential desktop configuration for leaders when talking with subordinates/receiving important visitors.

✓ Legal & Lawyer Communications

Protecting client privacy and ensuring absolute confidentiality of case details.

✓ Private Clubs

Providing an instant information security haven for VIPs in informal settings.

Specification ▶▶▶

Parameters	Technical Specifications
Model	AJB-332
Jamming Method	Ultrasonic Mixing Technology
Jamming Range	100% Effective within the box
Capacity	2 Slots
Power Supply	DC 12V3A(Type C) Adapter & Battery
Charging Time	≤ 2.5 Hours
Battery Working Period	≥ 8 Hours
Built-in Li Battery	13000mah, 14.4V
Indicators	White(Battery), Blue (Jamming), Green(Power)
Working Temperature	-20°C~ 45°C
Weight	1.3 kg
Outer Dimension	249.5mmx 199.5mmx 47 mm
Slot Dimension	173mm x 86mm
Packing Box Size	390mmx 270mmx 105 mm
